# Maximizing Your Poker Income

## The Ultimate Online Poker Bonus Guide

**Did you know that it's possible for *anyone* to make over \$65,000 a year playing online poker?** Many players are doing it right now. These players are NOT professional. Not even semi-pro. They are simply amateur rounders like you and I that love the game of poker! The only difference is that they understand the system and take advantage of these very lucrative strategies...and now you can too!

**Maximizing Your Poker Income** is a guide for people seeking to make the most of their online poker experience with the least possible risk. Whether you are a novice or a pro, this guide will give you the most efficient strategy for earning money at online poker. A "bonus whore" is a player who takes full advantage of the free profits attainable from various online poker rooms. By following the guide, practically anyone can make easy money if they can at least break even.

As poker has boomed in popularity in the last few years, so have online poker bonuses. Smart, observant players have realized that playing for bonuses can be very lucrative - to the point where professional "bonus whores" are starting to pop up.

Offering bonuses is a valuable marketing tool to attract new players and to get players to redeposit. In today's competitive market, offering poker players a bonus is a MUST for the poker room to stay viable.

There are currently more than 500 online poker rooms operating on the internet. If you're not using all of the resources available, you could be losing lots of money. The key to making money is to take advantage of the amazing 'sign-up' and 'reload bonus' money that the poker rooms pay out.

The basic strategy is this: Play only winnable hands, max out the bonus, cash out your earnings and move to the next. But, why do the online casinos allow this? The truth is they believe you'll lose the bonus money and your deposit. They believe that you will become a loyal and frequent player to their casino. In terms of money, the casinos know that a typical player will lose an average of \$350 per casino. However, YOU are not a typical player. You are what the industry calls an 'advantage player' or a 'bonus whore'. Your advantage will be based on your knowledge of how to maximize the bonus money and when to move on to the next.

Playing for bonuses is not always easy, though. Each site has unique terms and requirements in order to clear the bonus. Poker bonuses can be confusing. Just because a site has a big bonus does not mean it's better than another. There are issues that all 'bonus whores' will encounter and that's why I've created a bonus guide which gives players all of the information they need to know in order to make the best use of their time and money.

The sites listed first in the guide are the easiest sites to beat and the easiest sites to clear a bonus at. I have listed them in order for a reason. Many of the beginning sites also have generous reload offers that you can take advantage of while completing other sites. So, I highly recommend starting at the first site listed and going right on down the line. However, if for some reason a bonus is not appealing to you, feel free to skip it and move to the next or jump around.

NOTE: If you come across an unfamiliar term please refer to the [poker glossary](#) at the website.

## Securing Your Funds

The first thing you will need to do is open up an account at one of the online payment processors. The most popular are [ePassporte.com](http://ePassporte.com) and [eWalletExpress.com](http://eWalletExpress.com).

Once you have set up and verified your account, you are ready to go! After collecting the first few bonuses you should have a respectable bankroll. I recommend keeping at least \$2,000 in your ePassporte account (or whatever you decide to use) at all times. This will allow you to take advantage of bonuses that may be offered simultaneously.

NOTE: All information in this ebook is provided absolutely free of charge. **All we ask is that, if you find the content here useful and decide to open an account at an online poker room, please use our links.** This costs you nothing and helps support us, allowing us to keep providing all of this information free of cost.
